Message

Blind people are always oppressed in the society of Bangladesh. I believe that these people deserve more care than the normal human beings due to their disability. We should try to do something different for them to make their life easier because these people have lots of problem and feel themselves cut off from the society. They should not be allowed to feel that they are burden on the society.

Like a normal person they also need to exchange currencies to fulfill daily needs. But due to their disability they might often get fake banknotes. It is very difficult for them to identify the genuine banknote if they are not aware of the special security features incorporated in the banknotes.

We firmly believe that, necessary steps should be taken that will remove barriers, create solutions, and expand possibilities so people with vision loss can achieve their full potential. From this view, we have organized "1st Global Awareness Program on Banknote for the Blind-2016". Hope this awareness program will help the visually impaired people to some extent in their way of life.
