Message

Blind people are always oppressed in the society of Bangladesh. We see there is very little scope for the education of blind people in every district of our country. Meanwhile, the education system for blind becomes expensive as the massive blind people are not coming under the umbrella of education management. In this situation, it is very welcoming to us that IICT has initiated Awareness program on Bank Notes for Blind". Fake note circulation can only be reduced if all people are aware of the general features in our currency.

I wish this program becomes successful.
