Message

Money is most important and useful for daily life. Blind people also need to use the banknote for daily transaction. Keeping this in view currency notes need to possess some features apart from security feature for the benefit of the blind or visually impaired persons. It is observed that most of the people are not aware of the features contained in the banknote.

I appreciate the endeavor undertaken by International Institute of Currency Technology (IICT) to organize a seminar exclusively for the blinds to educate them to recognize bank note. I strongly feel that "1st Global Awareness Program on Banknote for the Blind" will be beneficial for the society as a whole and create a sense of awareness for the blind in particular by raising their level of self-confidence in exchanging banknotes.

I wish this seminar a great success.
