

Bangladesh Bank
Central Bank of Bangladesh

Nazneen Sultana
Former Deputy Governor

Message

Since some note counterfeiters are actively continuing their heinous activities in Bangladesh, it is a great challenge for Bangladesh Bank to prevent the intrusion of counterfeit notes. Bangladesh Bank have undertaken a lot of measures in this regard. Amongst these measures, sensitizing the public by organizing workshop/ seminar in the fake note prone and border areas, publicizing the security features of banknotes through Bangladesh Bank Website, electronic and print media, scheduled banks, district information offices etc are remarkable. Moreover Bangladesh Bank can take the pride of breaking the strong network of the note counterfeiters in the sacrificing cattle market since expert cash officers of the scheduled banks have been deployed for providing note detecting services to the cattle traders free of cost in all authorized sacrificing cattle market all over the country. These drives against the note counterfeiters have been continuing incessantly.

It is really praiseworthy that International Institute of Currency Technology (IICT) is going to organize a seminar for the visually impaired people for helping them to identify the genuine banknotes. I do believe that program like this would encourage others to come forward in devising new measures and techniques to fight against note counterfeiting.
